

A decorative graphic on the left side of the slide consisting of white and light blue lines and circles, resembling a circuit board or a stylized tree structure.

PAYMENT PORTAL

ANDRUSCO MARIAN

BUSINESS CASE

Application role is to simulate a payment portal.

The app features are to view the transaction the user made in different forms, to let you as a user to edit the transactions.

There are 2 types of users in the application they are regular users and super users.

UX/UI

I would like to present the design I made with Figma.

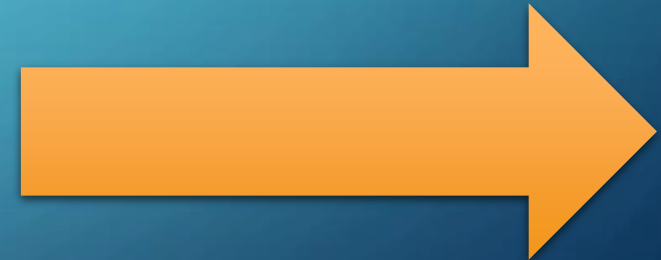

IMPLEMENTATION

At this moment the application is not fully implemented. So we have 2 types of pages with full functionality implemented and some of them will have only the HTML and the styles. To style the application I used Tailwind

The image shows a mockup of a WingBank login and signup interface. On the left, a dark blue panel contains the text "Welcome to WingBank" and "Log in to access your account". On the right, a light gray panel features the WingBank logo (an orange bird) and the text "Sign in to your account". Below this, a white form contains fields for "Email address" (with the value "darius@gmail.com") and "Password" (with the value "1234qwe,."). There is a checkbox for "Remember me" and a link for "Forgot your password?". At the bottom of the form are two buttons: a blue "Login →" button and a white "Signup →" button. At the very bottom of the gray panel, there is a line of placeholder text: "Lorem ipsum dolor sit amet. Lorem ipsum dolor sit ametdolor sit amet."

IN THE FUTURE

Short term:

- Implement the functionalities from user to transactions,
- Remake all the forms form template-driven to reactive forms,

Long term:

- Graphic for frequency page,
- User authentication and authorization,
- Option to add new users / transactions,
- Pagination,
- Security

thank you!
